

# HMI HUMAN MACHINE INTERFACE HMI

As a bridge between OT and IT, it combines traditional industrial automation products with new technologies such as the Internet of Things, edge computing, and digitalization to provide equipment manufacturers and equipment users with a new generation of HMI, improve efficiency, reduce costs, optimize management, and promote the intelligent development of equipment

## PRODUCT TYPE

6000 series IOT HMI

C0 series capacitance HMI

## CORE COMPETENCE

- ◆ Industrial touch screen configuration graphical compiler
- ◆ Industrial touch screen configuration graphical compiler
- ◆ Communication real-time scheduling technology
- ◆ Protocol conversion technology of industrial controller
- ◆ Data feedback and runtime iteration techniques
- ◆ Long-term highly reliable embedded memory management technology
- ◆ High performance strong real-time scripting technology
- ◆ Upgrade technology in the system
- ◆ Industrial data security storage technology

Wolong Electric Group CO.,LTD

## Wolong offers worldwide Motor and drive product solutions

As a global professional manufacturer of motor and drive products, Wolong is providing "high safety, high reliability and high efficiency" motor and drive product solutions to the global oil and gas, power energy, construction, rail transit, automotive engineering and equipment automation industries

**WOLONG**  
Power your future

Sales and service network covering  
24 countries worldwide  
"Whenever, anywhere, as you need"

# HMI

WT-6000 SERIES/WT-C0 SERIES

# 6000 SERIES IOT HMI

6000 SERIES IOT HMI

## Start a new era of HMI

6000 series, a new generation of iot HMI. Use industrial ABS plastic shell and aluminum alloy shell two materials for low cost and high reliability; New mold using a more practical downward/backward outlet way; Redesigned front face with a higher level of appearance; Optional Higher resolution models.

By selecting the iot module, you can immediately upgrade to the iot HMI and enjoy the complete industrial iot cloud platform services.

## PECULIARITY

The way to combine the IOT and the HMI is an innovative design in the industry, aiming to provide customers with a more economical and convenient HMI networking solution

- ◆ High definition, high light, wide viewing Angle display
- ◆ Dedicated iot module to achieve iot functions
- ◆ More economical and convenient HMI networking solutions such as cloud platform, remote configuration and download

# C0 SERIES CAPACITANCE HMI

C0 SERIES CAPACITOR HMI

## Focus on industrial HMI equipment

C0 series capacitor HMI, using low cost plastic shell, high reliability; Multi-point capacitive touch screen, anti-scratch, no drift; The main board have three anti-paint treatment, can adapt to various harsh environment; convenient installation without fastener; 4 serial port with Ethernet port, more powerful expansion ability; New configuration software, rich picture library, powerful functions.

## PECULIARITY

Let people's use habits and feelings on mobile devices transplant to the industrial HMI. So that even complex tasks also can be easily completed between the dots and strokes of gestures.

Hd, highlight, clarity, wide viewing Angle ◆

Multi-point touch, support gesture operation ◆

High environmental adaptability ◆

Configure your own screen page ◆
